DON'T LET YOUR DENTAL PLAN DICTATE YOUR TREATMENT

We are committed to providing you and your family with the best possible dental care, including long-term preventive care. Many of you have an employer-assisted dental health plan to help offset the cost of ongoing oral health care. It's important to remember that you are a partner with us in your oral health, and that treatment and care decisions should be made together with us, specifically designed around your needs.

A dental plan helps cover the cost of dental care. It may not cover the full cost of the specific treatment you require. *A dental plan is not a treatment plan.*

Don't allow your dental plan to dictate the care you receive. Some dental plans exclude necessary dental treatments such as sealants, orthodontics, and crowns and bridges. Some plans will only provide the level of benefit allowed for the least expensive way to treat a dental need, regardless of the most effective treatment required.

By taking care of your dental health you are making a long-term investment in your own well-being, and that of your family. If we can be of any help to you in understanding your dental plan, and how it can function as part of your treatment plan, please let us know.
